

## Piko Assessments Wed Apr 17 11:18:18 HST 2024

Name	Pacific Islands Regional Climate Assessment (PIRCA)
Lead Agencies	PaCIS, Pacific RISA, PICCC
Contacts	John Marra, NOAA/NCDC/PaCIS, john.marra@noaa.gov Melissa Finucane, EWC, Pacific RISA, finucanm@eastwestcenter.org Victoria Keener, EWC, Pacific RISA, keenerv@eastwestcenter.org Deanna Spooner, PICCC, deanna.spooner@piccc.net
Partnering Agencies	PRiMO, NOAA, USGS, USFWS, WRCC, University of Hawaii, University of Guam
Types	- Needs And Capabilities - Needs
	- Capacity
Area of	- Capabilities
Applicability	- National and Regional
Focus Area	<ul> <li>Fresh Water Resources and Drought</li> <li>Coastal Inundation/Sea Level Rise, Extreme Weather, and Community Resilience</li> <li>Marine and Terrestrial Ecosystems</li> </ul>
Regions	<ul> <li>Central North Pacific</li> <li>State Of Hawaii</li> <li>Western North Pacific</li> <li>CNMI</li> <li>FSM</li> <li>Guam</li> <li>Palau</li> <li>RMI</li> <li>South Pacific</li> </ul>
Status	- American Samoa - Completed

	Climate Change and Pacific Islands: Indicators and Impacts is a report that was created under the auspices of the Pacific Islands Regional Climate Assessment (PIRCA), a collaborative endeavor involving nearly 100 independent experts. In support of the National Climate Assessment (NCA), the report assesses the state of climate knowledge, impacts, and adaptive capacity in three sub-regions: (1) the Western North Pacific (CNMI, Guam, Palau, FSM, RMI); (2) the Central North Pacific (Hawaii); and (3) the Central South Pacific (American Samoa). The framework for the assessment includes three focus areas: (1) preserving fresh water resources and minimizing the impacts of drought; (2) fostering community resilience to the impacts of sea level rise, coastal inundation, and extreme weather; and (3) sustaining marine, freshwater and terrestrial ecosystems.
