Description	This project aims to improve the reliability and scope of weather observation on outer islands, and reporting to the National Meteorological Services.	
Objectives/Out comes	Institutional strengthening of the National Meteorological Services. To foster greater appreciation and use of various meteorological products that are produced directly or indirectly from outputs of the National Meteorological Services. To increase the National Meteorological Service role in enabling the public and individuals to be able to manage risks from extreme weather events.	
Lead Agencies Kiribati Meteorological Service, MCTT		

Partnering Agencies	The information for this activity was provided by the Adaptation Partnership from their Pacific chapter review of planned and existing adaptation activities. These reviews provide an inventory of regional and country-level adaptation activities and a summary of key adaptation priorities, based on documents like the UN Framework Convention on Climate Change's National Adaptation Programs of Action and National Communications. They also identify gaps and opportunities for scaling up and enhancing collaboration.
